Title: What it means to invest in a program that invests in You.

Pitch:

In a musical theatre program it is easy to be lost in the group but the whole take away from your studies should be about how to stand out.

This will be a personal essay discussing my experience in choosing my MT program.

I was an inaugural graduate from a conservatory with a brand new MT program. I was a guinea pig and I made that choice because I felt that it was the program most invested in me.

This essay will discuss how I knew that this school was the right fit for me and had the most investment in my success in this industry.
